Ukraine, Kyiv

SUMMARY

Python developer with hands-on experience building backend-oriented applications, integrating REST APIs, processing structured data, and deploying applications to cloud environments.

Professional experience in AI data operations, including data validation, dataset preparation, and structured data processing for computer vision machine learning tasks.

Practical experience with Python, Django, Flask/FastAPI, SQL, PostgreSQL, REST APIs, Docker, AWS, Git, and CI/CD. Interested in backend development and software engineering roles.

WORK EXPERIENCE

AI Data Operations Specialist

August 2025 – Present

- Performed dataset validation and quality assurance for machine learning training data across large annotated datasets.
- Reviewed and validated data according to defined quality and consistency requirements.
- Contributed to the preparation and processing of training datasets used in computer vision tasks.
- Worked with structured data formats, including JSON, during dataset preparation and validation.
- Identified data inconsistencies and quality issues and supported their resolution during the dataset preparation process.
- Worked with data processing workflows supporting machine learning model training.

TECHNICAL SKILLS

- Programming: Python, JavaScript
- Backend: Django, Flask
- Databases: SQL, PostgreSQL
- APIs: REST APIs, API integration, JSON
- Cloud & DevOps: AWS, Docker
- Frontend: HTML, CSS, JavaScript

EDUCATION

Bachelor's Degree in Applied Linguistics

Lviv Polytechnic National University

2021–2025

LANGUAGES

- Ukrainian
- English – Upper-intermediate
